1. Evolution of Airline Passenger Origin and Destination Statistics in Canada

Canada has, for a number of years, been in the forefront of research into the collection, analysis, processing and publication of air passenger origin and destination statistics. The first published domestic statistics date back as far as 1946. At that time data were collected on a March and September sample basis and were derived from the ticket sales of the participating Canadian carriers. The "ticket sales" approach tended to reflect passenger intent rather than observed passenger behaviour, resulting generally in an over-estimation of traffic volumes. Consequently, in 1959, the O & D survey was revamped so that the source of the data collected was the routing information provided by the first coupon lifted by a contributing Canadian carrier. In addition, in order to improve the reliability of annual passenger traffic estimates, a continuous systematic sample was employed in place of the March and September sample.

2. Source of Data

Passenger origin and destination statistics are collected under the authority of the Aeronautics Act at the request of the Air Transport Committee of the Canadian Transport Commission. The scheduled carriers participating in the current survey are Air Canada, CP Air, Eastern Provincial Airways, Pacific Western Airlines, Quebecair and Transair. The non-scheduled carriers participating are Nordair and Norcanair.

3. Scope of Survey and Reporting Method

The data summarized in this report are drawn from passenger coupons pertaining to unit toll transportation. A 10% continuous systematic sample is employed by Air Canada and CP Air and a 20% sample by all other carriers. The 10% sample is based on coupons lifted which have a number ending in "0"; the 20% sample also includes coupons ending in "5". To avoid duplication carriers are instructed to report only if they are the first participating carrier to lift a coupon.

This report, within the confines of "mainline" revenue passenger traffic, presents statistics in two parts.

Part I deals with Domestic or intra-Canada Traffic, the statistics therein, having been compiled using the Directional Origin and Destination (DOD) concept. This approach necessitates breaking symmetrical, circle and open-jaw itineraries into one-way, single direction journeys. As a general rule, itineraries are broken at the farthest point from the origin. For example, an itinerary reported as Montreal-Toronto-Vancouver-Calgary-Toronto-Montreal would be broken at Vancouver into two separate journeys, namely;

Montreal-Toronto-Vancouver, and
Vancouver-Calgary-Toronto-Montreal

However, intermediate points within the journey are not shown, merely points of origin and destination.

1. Évolution de la statistique d'origine et de destination des passagers aériens au Canada

Pendant de nombreuses années, Le Canada a été à l'avant-garde des recherches concernant la collecte, l'analyse, le traitement et la diffusion de statistiques d'origine et de destination des passagers aériens. Les premières statistiques sur le trafic intérieur ont été publiées dès 1946. A cette époque, les données étaient recueillies sur la base d'échantillons prélevés en mars et en septembre, et étaient issues du chiffre des ventes de billets assurées par les transporteurs canadiens participant à ce programme. La méthode fondée sur les "ventes de billets" avait tendance à rendre compte des intentions des passagers sans parvenir à appréhender le comportement réel des passagers, ce qui se traduisait généralement par une surestimation du volume de trafic. En conséquence, on a donc réorganisé l'enquête sur les origines et destinations en 1959 et adopté comme source des données le premier volet du billet d'avion que détache l'un des transporteurs canadiens participants. En outre, afin d'améliorer la fiabilité des estimations du transport-voyageur annuel, on a eu recours à un échantillonnage systématique continu au lieu de l'échantillon de mars et de septembre.

2. Source des données

Les statistiques d'origine et de destination des passagers sont recueillies en application de la Loi sur l'aéronautique et à la demande du Comité des transport aériens de la Commission canadienne des transports. Les transporteurs suivants, exploitant des services à horaires fixes, participant à l'enquête actuelle: Air Canada, CP Air, Eastern Provincial Airways, Pacific Western Airlines, Québecair et Transair. Les transporteurs suivants, qui n'exploitent pas de service à horaire fixe, y participant également: Nordair et Norcanair.

3. Portée du relevé et méthode de collecte

Le présent rapport résume des données tirées des volets de billets de passage se rapportant aux transports à tarif unitaire. Air Canada et CP Air appliquent un échantillonnage systématique continu de 10 p. 100, et les autres transporteurs ont recours à un échantillon de 20 p. 100. L'échantillon de 10 p. 100 porte sur tous les volets qui ont été détachés et dont le numéro se termine par "0", et l'échantillon de 20 p. 100 comprend en plus les volets dont le numéro se termine par "5". Afin d'éviter tout double emploi, il est demandé à chaque transporteur de n'inclure que les volets qu'il a été le premier à prélever pour les besoins de l'enquête.

Le présent rapport présente les statistiques se limitant au transport-voyageur payant sur les "lignes principales" en deux parties.

La partie I traite du trafic intérieur, ou interne au Canada, et les statistiques qu'elle contient ont été rassemblées selon le principe de l'origine et destination du voyage simple ("DOD"). Cette méthode exige que l'on décompose les itinéraires symétriques, circulaires et "open-jaw" ("en fer à cheval") en voyage aller simple, dans une seule direction. En règle générale, on découpe les itinéraires à partir du point le plus éloigné du point d'origine. Dans l'exemple d'un itinéraire Montréal-Toronto-Vancouver-Calgary-Toronto-Montréal, la subdivision se ferait à partir de Vancouver, en deux voyages distincts, c'est-à-dire:

Montréal-Toronto-Vancouver, et
Vancouver-Calgary-Toronto-Montréal

Les points intermédiaires ne figurent cependant pas, et on n'indique que l'origine et la destination.

Tables 1 through 4 describe O & D data of a "pure" domestic nature, that is to say, the data are derived from DOD journeys whose origin and destination are Canadian points. The routing detail, however, may include United States border cities. For example, a journey such as Montreal-Chicago-Seattle-Vancouver is considered domestic.

The data in Appendices 1 through 4 are derived from international DOD's containing two or more adjacent Canadian points in the routing. It is these Canadian points which form the "Domestic Portion". Examples showing the Domestic Portion underlined are:

Montreal-Toronto-Vancouver-Tokyo, and
New York-Toronto-Vancouver-Tokyo

Part II is concerned with the volume of passenger traffic originating at Canadian cities, regardless of the ultimate destination. These statistics are compiled on the basis of the Ticket Origin & Destination (TOD) concept which requires that itineraries remain unbroken.

If, for example, a 10 passenger itinerary is reported as Quebec-Montreal-New York-Miami-Toronto, the 10 passengers will be credited to Quebec since it is the first city to appear in the unbroken itinerary.

Entire itineraries are reported in so far as three letter airport codes contained in the Official Airline Guide will permit. Should itineraries begin or end in remote places not assigned three letter codes, these itineraries are reported as commencing or ending at the first or last cities in the routings which have three letter codes assigned.

4. Utilization of the Report

O & D statistics are used extensively by airlines, airports, manufacturers of aircraft and aircraft engines, consultants and research organizations, chambers of commerce, hotels, travel organizations, government aviation authorities and other government departments and agencies. Such organizations make use of O & D statistics for: route planning and development; general economic analyses in air transportation including forecasting; airport planning; sales administration and travel promotion; schedule planning; airline investment analyses; development of new aircraft and aircraft engine designs; airways planning; and studies in tourism, travel and immigration.

The O & D statistics in this report can be used to indicate the relative community of interest between different centres and the approximate volumes of traffic generated at individual Canadian points. The figures do not, however, give recognition to passengers stopping over at an intermediate point or points en route to their destination. For example, although an itinerary from Montreal to Vancouver may involve several visits en route, only the initial origin and final destination are taken into account.

Les tableaux 1 à 4 font apparaître des données sur les origines et les destinations "purement" intérieurs, c'est-à-dire que les données proviennent des voyages "DOD" qui prennent pour origine et pour destination des points situés au Canada. L'itinéraire détaillé peut, cependant, inclure des villes frontalières situées aux États-Unis. On considérera par exemple qu'un voyage menant de Montréal à Vancouver en passant par Chicago et Seattle ressortit au trafic intérieur.

Les données contenues aux appendices 1 à 4 proviennent des voyages "DOD" dont l'itinéraire comporte au moins deux points adjacents situés au Canada. Ce sont ces points situés au Canada qui délimitent "le trajet intérieur". Dans les exemples suivants, les trajets intérieurs ont été soulignés:

Montréal-Toronto-Vancouver-Tokyo, et
New York-Toronto-Vancouver-Tokyo

La partie II traite du volume du transport-voyageur prenant pour origine une ville canadienne, quelle que soit la destination finale. Ces statistiques ont été rassemblées selon le principe d'origine et de destination du voyage complet (en anglais: Ticket Origin and Destination, en abrégé TOD), qui exige que les itinéraires ne soient pas subdivisés.

Si une déclaration indique, par exemple, que l'itinéraire pour 10 passagers porte sur Québec-Montréal-New York-Miami-Toronto, les 10 passagers seront décomptés au profit de Québec, puisque c'était la ville qui apparaissait en premier lieu dans l'itinéraire intégral.

L'itinéraire est déclaré dans sa totalité, pour autant que les codes à trois lettres désignant les aéroports tirés du guide officiel des lignes aériennes le permettent. Si un itinéraire devait prendre pour point d'origine ou pour destination un endroit éloigné n'ayant pas de code à trois lettres, la déclaration porterait sur l'itinéraire parcouru entre la première et la dernière ville figurant à la liste des codes à trois lettres.

4. Utilisation du rapport

Les statistiques d'origine et de destination font l'objet d'une utilisation intensive par les compagnies aériennes, les aéroports, les constructeurs d'aéronefs et de moteurs d'avion, par les organisations de consultation et de recherches, les chambres de commerce, l'hôtellerie, les agences de voyages, les milieux aéronautiques du secteur public et par d'autres ministères et organismes publics. Ces organismes utilisent les statistiques d'origine et de destination pour la planification et le développement des routes aériennes; l'analyse économique d'ensemble des transports aériens et les prévisions qui s'y rapportent; la planification des aéroports; l'administration des ventes et la publicité touristique; les prévisions d'horaires; l'analyse des investissements des compagnies aériennes; le développement de nouvelles conceptions en matière d'aéronefs et de moteurs d'aviation; la planification des lignes aériennes, et les études concernant le tourisme, les voyages et l'immigration.

Les statistiques d'origine et de destination qui figurent dans le présent rapport peuvent servir à dégager l'intérêt commun de divers centres ainsi que le volume approximatif de trafic qui existe en divers points du Canada. Les chiffres ne tiennent cependant pas compte des arrêts des passagers à l'un ou plusieurs des points intermédiaires compris dans leurs itinéraires en cours de route. Par exemple, bien qu'un itinéraire menant de Montréal à Vancouver puisse comporter plusieurs séjours en d'autres lieux intermédiaires, seuls le point d'origine et la destination seront pris en considération.

5. Complexities

Year to year analysis of O & D statistics is complicated by such factors as extension or improvement of airport facilities, and the development, suspension or termination of airline services. Special care should be exercised when comparing 1968 annual O & D totals with those of other years. Previously, itineraries were broken by personnel of the participating carriers, whereas since 1968 itineraries have been broken automatically by computer with a minimum of manual intervention by the staff of the Aviation Statistics Centre.

Some assistance in interpreting totals which cover less than a full year is provided in the section "Station Footnotes".

6. Circulation

The Aviation Statistics Centre of DBS publishes O & D statistics on behalf of the Air Transport Committee of the Canadian Transport Commission in response to the many requests received from public authorities, the industry and other interested parties. Comments on the usefulness of this report together with suggestions for improvement are always welcome.

5. Difficultés

L'analyse des statistiques d'origine et de destination d'une année à l'autre se complique par exemple du fait de l'agrandissement ou de l'amélioration de l'infrastructure des aéroports, et par le développement, la mise en sommeil ou la cessation d'activité des services des compagnies aériennes. Si l'on veut comparer la statistique annuelle totale d'origine et de destination pour 1968 à celle d'autres années, il faut procéder avec prudence. Auparavant, c'est le personnel des transporteurs participants qui se chargeait de subdiviser les itinéraires, alors que pour 1968, les itinéraires ont été subdivisées automatiquement par l'ordinateur, l'intervention manuelle du personnel du Centre des statistiques de l'aviation étant minime.

La section "Notes relatives aux stations" comporte un certain nombre d'éclaircissements qui aideront à interpréter les totaux qui se rapportent à des périodes inférieures à un an.

6. Diffusion

Le Centre des statistiques de l'aviation du B.F.S. publie des statistiques sur l'origine et la destination pour le compte du Comité des transports aériens de la Commission canadienne des transports, répondant ainsi aux nombreuses demandes exprimées par les autorités publiques, l'industrie et de nombreux autres intéressés. Toute observation au sujet de l'utilité du présent rapport, ainsi que toute proposition visant à son amélioration sera toujours accueillie favorablement.

STATION FOOTNOTES

1968

1. The British Columbia Government Ferry was not operated between Vancouver and Victoria due to a strike from February 16 to March 1.
2. The service Prince Rupert-Alice Arm-Stewart operated by Pacific Western Airlines was transferred August 1 to TransProvincial Airlines, a non-participant in the O & D survey.
3. Eastern Provincial Airways initiated a Class 2 service Charlottetown-Charlo-Montreal on October 28.

NOTES RELATIVES AUX STATIONS

1968

1. En raison d'une grève, le British Columbia Government Ferry entre Vancouver et Victoria n'a pas fonctionné du 16 février au 1^{er} mars.
2. Le service Prince Rupert-Alice Arm-Stewart exploité par Pacific Western Airlines a été repris le 1^{er} août par TransProvincial Airlines, qui ne participe pas à l'enquête sur l'origine et la destination.
3. Le 28 octobre, Eastern Provincial Airways a inauguré un service de classe 2 sur l'itinéraire Charlottetown-Charlo-Montréal.

GLOSSARY OF TERMS

Circle Itinerary: An itinerary that begins and ends at the same point in which the inbound portion does not retrace the path of the outbound portion.

City Pair: Two cities between which travel is authorized by a ticket or part of a ticket. The two cities are the directional origin and destination in the case of Part I Tables 3 and 4, and in the case of Appendices 3 and 4 the domestic portion of the DOD.

Coupon: Each of the component parts of a ticket containing separate travel authority for the different trip segments of the total travel covered by the passenger ticket.

Directional Origin and Destination (DOD): In the case of a one way itinerary, directional origin and destination and ticket origin and destination are the same. In the case of symmetrical, circle and open-jaw itineraries, the routing is divided into separate outbound and inbound one-directional journeys, each with its own directional origin and destination.

Domestic: Journeys beginning and terminating in the Provinces and Territories, but which may be routed via United States border cities, are considered domestic for this report.

Domestic Portion: Two or more adjacent Canadian points in the routing of an international DOD; for example, Los Angeles - Toronto-Montreal-London (England); Calgary-Regina-Winnipeg-Chicago. (The domestic portion is underlined.)

Itinerary: All points in the passenger journey, beginning with the origin, followed by the routing, and ending with the destination, in the sequence shown in the fare ladder section of the coupon.

Intermediate Point: Any point in an itinerary, other than the origin and destination, at which the passenger makes an inter-line or intraline connection or stopover.

International: The world area outside Canada.

Mainline: That type of unit toll operation usually having a considerable degree of regularity, and where in most cases only Group A aircraft are used, and one where the service is generally listed in a published timetable and performed according to a filed service pattern. Consideration is also given to the overall frequency of flights and the type and degree of surface transportation serving particular points.

Open-jaw Itinerary: Similar to a circle itinerary except that the initial and terminal points are not the same.

Participating Carrier: An air carrier which is required to file O & D reports on Air Transport Committee Statement 35.

Point: A city or airport.

Revenue Passenger: A person receiving unit toll air transportation from an air carrier for which remuneration is received by the air carrier.

Stopover: An intermediate stop in an itinerary where the passenger arrives at and departs from the point on different days.

Symmetrical Itinerary: An itinerary that begins and ends at the same point in which the inbound portion retraces the path of the outbound portion.

Ticket: The booklet containing the auditor's coupon and individual passenger travel authorizations consisting of the flight coupon (or coupons) covering the passenger's complete itinerary.

Ticket Origin and Destination (TOD): The first and last points named in the passenger's ticket.

Unit toll: Transportation at per passenger rates.

Billet: Carnet contenant le volet de contrôle et les bons individuels de transport des passagers et comprenant le billet de passage (ou les billets de passage) se rapportant à l'itinéraire complet du passager.

DOD: (Directional Origin and Destination) Voir: Origine et destination d'un voyage.

"Fer à cheval": Voir: Itinéraire "open jaw".

Intérieur: Pour le présent rapport, sont considérés comme voyages intérieurs tous ceux dont le point d'origine et le point de destination se situent à l'intérieur d'une province ou d'un territoire canadien même si leur itinéraire passe par une ville frontalière des États-Unis.

International: Ensemble du monde en dehors du Canada.

Itinéraire: Tous les points compris dans le voyage d'un passager, à commencer par le point d'origine, et se terminant à la destination, dans l'ordre où ils apparaissent dans la partie du billet qui mentionne les prix de passage.

Itinéraire circulaire: Itinéraires qui commence et finit au même point, sans que le parcours de retour soit le même que le parcours aller.

Itinéraire "open jaw": Analogue à l'itinéraire circulaire, sauf que le point d'origine n'est pas le même que le point de destination.

Itinéraire symétrique: Itinéraire qui commence et finit au même point et où le parcours de retour est le même que le parcours aller.

Ligne principale: Service à tarif unitaire généralement caractérisé par une très grande régularité et ne faisant, la plupart du temps, appel qu'à des appareils de classe A, et dont les horaires figurent généralement dans un indicateur publié et sont conformes à un modèle de service enregistré. On tient également compte de la périodicité d'ensemble des vols ainsi que du type et de la fréquence de moyens de transport routiers desservant les divers points.

"Open jaw": Voir: Itinéraire "open jaw".

Origine et destination d'un voyage simple (DOD): Dans le cas d'un voyage aller simple, l'origine et la destination du voyage simple et l'origine et la destination portées sur le billet sont identiques. Dans le cas d'itinéraires symétriques, circulaires et "open jaw", on procède à une subdivision distinguant entre voyages au départ et à l'arrivée portant chacun sur une seule direction, chaque voyage ayant sa propre origine et sa propre destination.

Origine et destination du voyage complet (TOD): Premier et dernier points mentionnés sur le billet du passager.

Paire de villes: Groupe de deux villes entre lesquelles le passager a le droit de se déplacer en vertu d'un billet ou d'un volet. Les deux villes constituent l'origine et la destination d'un voyage simple dans le cas des tableaux 3 et 4 de la partie I, et le trajet intérieur d'origine et de destination d'un voyage simple dans le cas des appendices 3 et 4.

Point: Ville ou aéroport.

Point d'escale: Arrêt en cours d'itinéraire où le passager arrive et dont il repart à des jours différents.

Point intermédiaire: Tout point d'un itinéraire à l'exception de l'origine et de la destination où le passager s'arrête pour prendre une correspondance sur la même ligne ou sur une ligne différente, ou pour faire escale.

Tarif Unitaire: Transport dont le taux est fixé par passager.

TOD: (Ticket Origin and Destination) Voir: Origine et destination du voyage complet.

Trajet intérieur: Ensemble de deux point adjacents ou plus en territoire canadien compris dans un itinéraire à origine et destination internationales. Exemples: Los Angeles-Toronto-Montréal-Londres: Calgary-Regina-Winnipeg-Chicago. (Les trajets intérieurs ont été soulignés.)

Transporteur participant: Transporteur aérien soumis à l'obligation de faire des déclarations sur l'origine et la destination des passagers au moyen de l'état n° 35 du Comité des transports aériens.

Volet: Toute partie d'un billet représentant l'un des titres de transport valables pour les diverses sections d'itinéraires qui constituent l'ensemble du voyage prévu par le billet de passage.

Voyageur payant: Personne effectant un voyage aérien aux termes d'un tarif unitaire assuré par un transporteur aérien qui perçoit une rétribution à ce titre.
